Your Mac is enrolled — here's what to do next.

Follow these three steps to finish setting up your school MacBook. The whole process takes about 15–20 minutes and you only need to do this once.

1. Sign In to Your Account
2. Wait for Apps to Install
3. Set Up OneDrive

1 Sign In to Your School Account

Takes about 2 minutes · 🔔 Watch for a notification

Shortly after enrollment, a **pop-up notification** will appear in the top-right corner of your screen. This is your Mac asking you to connect your Microsoft account — it's a one-time step.

1. Watch for a notification that says **"Sign in"** or **"Registration required."** Click it when it appears.
2. A sign-in window will open. Enter your **CCPS email address** (e.g. *smith.john@ccpsstaff.org*).
3. Enter the **Microsoft password you set up** for your Microsoft account.
4. If prompted, approve the sign-in on your phone using the **Microsoft Authenticator app** or by entering a short code sent to your phone.

> 💡 **Don't see the notification?** Click the date and time in the top-right corner of your screen to open your notification list — it may be waiting there.

> ⚠️ **Please don't skip this step.** Until you sign in, you may have trouble accessing your email, Teams, and other school apps.

2 Wait for Your Apps to Install

No action needed · ⏳ Usually 15–30 minutes

You might notice some icons on the dock as **question marks**. This is completely normal — your apps are downloading in the background.

1. Your school apps (Teams, Chrome, and others) are installing automatically. You don't need to do anything.
2. This usually takes **15–30 minutes** depending on your internet speed.
3. Once each app is ready, its icon will update and you can start using it.

> ⚠️ **Important:** Please **don't remove or drag away** any icons from the Dock while they're still installing — they'll fix themselves once the apps finish.

> ✅ **You're all set when** all the icons at the bottom of your screen look correct and open normally when clicked.

---

3 Get Your Files with OneDrive

Takes about 5 minutes · ☁️ Access files from anywhere

OneDrive keeps your school files backed up and accessible from the cloud. Here's how to get it set up:

1. Open **OneDrive** from the Dock at the bottom of your screen — it looks like a blue cloud icon.
2. Sign in with your **CCPS email address** and **Microsoft password**.
3. Click through the setup screens — the default options are fine, just keep clicking **Next**.
4. OneDrive will start syncing. A **OneDrive folder** will appear in the sidebar of your file browser.
5. From now on, **save your documents to the OneDrive folder** to keep them backed up and easy to find.

> ✅ **Already seeing your files?** Some Macs may have OneDrive set up automatically. If you open OneDrive and your school files are already there, you're all set — no additional setup needed!

> 💡 **Working from home?** Access all your files from any browser at **office.com** — just sign in with your CCPS email and Microsoft password.
