

Your Mac is enrolled — here's what to do next.

Follow these two steps to finish setting up your school MacBook. The whole process takes about 15–30 minutes — most of it just waiting while your apps install — and you only need to do this once.

1 Wait for Apps to Install

2 Set Up OneDrive

1 Wait for Your Apps to Install

No action needed · ⌚ Usually 15–30 minutes

You might notice some icons on the Dock as **question marks**. This is completely normal — your apps are downloading in the background.

- 1 Your school apps (Teams, Chrome, and others) are installing automatically. You don't need to do anything.
- 2 This usually takes **15–30 minutes** depending on your internet speed.
- 3 Once each app is ready, its icon will update and you can start using it.

⚠ Important: Please **don't remove or drag away** any icons from the Dock while they're still installing — they'll fix themselves once the apps finish.

✓ You're all set when all the icons at the bottom of your screen look correct and open normally when clicked.

Get Your Files with OneDrive

Takes about 5 minutes ·  Access files from anywhere

OneDrive keeps your school files backed up and accessible from the cloud. Here's how to get it set up:

- 1 Open **OneDrive** from the Dock at the bottom of your screen — it looks like a blue cloud icon.
- 2 Sign in with your **CCPS email address** and **Microsoft password**.
- 3 Click through the setup screens — the default options are fine, just keep clicking **Next**.
- 4 OneDrive will start syncing. A **OneDrive folder** will appear in the sidebar of your file browser.
- 5 From now on, **save your documents to the OneDrive folder** to keep them backed up and easy to find.

✓ **Already seeing your files?** Some Macs may have OneDrive set up automatically. If you open OneDrive and your school files are already there, you're all set — no additional setup needed!

💡 Access all your files from any browser at **office.com** — just sign in with your CCPS email and Microsoft password.
